

Program of the 50th Annual Meeting of Japanese Society of Pediatric Surgeons

First Day (May 30, Thursday)

Room 1 (Concord Ballroom AB)

AM

8:15~8:30

Opening Remarks

8:30~10:00

Panel Discussion 1 Surgery for patients with chromosomal abnormalities

Moderators Yuji Nirasawa (Kyorin University)

Masahiko Sugiyama (The University of Tokyo)

PD1-1 The operation strategy of trisomy-18 with esophageal atresia

Department of Pediatric Surgery, Kanazawa Medical University

Takahiro Oshikiri

PD1-2 Surgical treatment for 18trisomy in our hospital

Hyogo Children's Hospital

Takuya Yoshida

PD1-3 Surgery in Infants with Trisomy 18 Syndrome

Pediatric Surgery, Japanese Red Cross Medical Center

Kazuo Ishida

PD1-4 Surgery for Patients with Severe Chromosomal Abnormalities

Department of Pediatric Surgery, Faculty of Medicine, University of Tsukuba

Yasuhisa Urita

PD1-5 Surgical interventions for patients with 13 trisomy and 18 trisomy

Department of Surgery, Kanagawa Children's Medical Center

Masashi Minato

PD1-6 Surgical management of esophageal atresia in patients with trisomy 18

Department of Surgery, Nagano Children's Hospital

Tomoko Hatata

PD1-7 The examination about the surgical management for the infant with trisomy 18 in our department

Department of Pediatric Surgery, The University of Tokyo Hospital

Masahiko Sugiyama

10:20~11:50

JSPS 50th Anniversary Memorial Round Table

Moderator Hiroaki Kitagawa (St. Marianna University)

Main Theme: The Role of Scientific Journals in Pediatric Surgery

History of the Japanese Journal of Pediatric Surgery

Honorary Member of the Japanese Society of Pediatric Surgeons

Keijiuro Suruga

Scientific Publishing –Ethical considerations:

Fraud, duplication and plagiarism–

Editor-in-Chief, Journal of Pediatric Surgery

Jay L. Grosfeld

How to Prepare a Manuscript for Publication

Editor-in-Chief, Paediatric Surgery International
Prem Puri

12:00~13:00

Luncheon Seminar 1

PM

13:00~13:30

Congress Chairman's Address

Moderator Yoshinori Hamada (Kansai Medical University)

The role of evidence in medical science: Development of surgery and message for public health

Department of Pediatric Surgery, Graduate School of Medicine, The University of Tokyo

Tadashi Iwanaka

13:30~14:00

Presidential Address

Moderator Masaki Nio (Tohoku University)

Progress and Future of Japanese Society of Pediatric Surgeons (JSPS)

Department of Pediatric Surgery, Kyushu University

Tomoaki Taguchi

14:00~15:00

Invited Lecture

Moderator Tadashi Iwanaka (The University of Tokyo)

Pediatric Surgery: The Past, Present, and Future

Moritz M Ziegler

16:30~17:30

Requested Theme Session 1 Present and future aspects of pediatric cancer research

Moderators Junko Takita (The University of Tokyo)

Tatsuro Tajiri (Kyoto Prefectural University of Medicine)

Keynote Lecture 1 Translational research for pediatric malignant solid tumors

Department of Pediatrics, Kyoto Prefectural University of Medicine

Hajime Hosoi

OS1-1 Epithelial-mesenchymal transition (EMT) in neuroblastoma and tumor progression

Department of Pediatric Surgery, The University of Tokyo

Hiroaki Komuro

OS1-2 Genome-wide DNA methylation analyses to establish a molecular-genetic marker in hepatoblastomas

Department of Gastroenterological Surgery I, Hokkaido University Graduate School of Medicine

Shohei Honda

OS1-3 A novel therapeutic approach for pediatric solid tumors using NKT cell mediated antitumor effect

Department of Pediatric Surgery, Chiba University Graduate School of Medicine

Tomoro Hishiki

OS1-4 An Augmented Reality Navigation System for Endoscopic Surgery for Pediatric Tumors

Department of Pediatric Surgery, Kyushu University Graduate School of Medical Science

Ryota Souzaki

Room 2 (Concord Ballroom C)

AM

8:30~9:10

Oral Session 1 Body surface Moderator Junji Kato (Aichi Prefectural Colony Central Hospital)

- O1-1 A Case Report: Malignant Transformation of Lymphangioma with Intractable Ulcer
The Department of Pediatric Surgery of Tokyo University
Toshiko Takezoe
- O1-2 When is the best timing of pediatric breast tumor resection?
Department of Surgery, Sapporo City General Hospital
Yumi Okawa
- O1-3 The effectiveness and limit of the tape fixation for umbilical hernia
Department of Pediatric Surgery, Miyazaki Prefectural Miyazaki Hospital
Susumu Matsuo
- O1-4 Postoperative nausea and vomiting after laparoscopic percutaneous extraperitoneal closure
Department of Pediatric Surgery, Kakogawa West City Hospital
Masao Yasufuku
- O1-5 LPEC for inguinal hernia in children: clinical outcome Pediatric Surgery, Ehime University Hospital
Kazuhiro Kameoka

9:10~10:15

Requested Theme Session 2 Forefront of pediatric liver transplantation

Moderators Yukihiro Inomata (Kumamoto University)
Koichi Mizuta (Jichi Medical University)

- OS2-1 Experience of living-donor liver transplant cases with hepatorenal syndrome and therapeutic strategy
Transplant Surgery, Jichi Medical University
Yoshiyuki Ihara
- OS2-2 A case of infant ALL with liver transplantation for severe VOD
Department of Pediatric Surgery, Okayama University Hospital
Takanori Oyama
- OS2-3 The outcome of the patients on the waiting list for deceased donor liver transplantation
National Center for Child Health and Development
Seisuke Sakamoto
- OS2-4 The outcome of liver transplantation: A single center experience
Department of Pediatric Surgery, Reproductive and Developmental Medicine, Kyushu University
Makoto Hayashida
- OS2-5 Long-term outcome of living-related liver transplantation in children at our institution
Kanagawa Children's Medical Center
Masato Shinkai
- OS2-6 Graft fibrosis after liver transplantation –efficacy of ARFI imaging–
Department of Surgery, School of Medicine, KEIO University
Ken Hoshino
- OS2-7 Novel treatment strategies to improve the prognosis and QOL in pediatric liver transplantation
Division of Transplant Surgery, Department of Surgery, Jichi Medical University
Koichi Mizuta

12:00~13:00

Luncheon Seminar 2

PM

16:30~17:25

Requested Theme Session 3 Surgical intervention for extremely low birth weight infants

Moderators Akio Kubota (Wakayama Medical University)
Akiko Yokoi (Kobe Children's Hospital)

OS3-1 Strategy for severe acquired laryngeal stenosis in low birth weight infants

Department of Pediatric Surgery, Ibaraki Children's Hospital
Misako Hirai

OS3-2 Pediatric surgery in extremely low birth weight infant; excluding NEC/LIP/MRI

Department of Surgery, Kanagawa Children's Medical Center
Kyoko Mochizuki

OS3-3 Operative management for extremely low-birth-weight infants

Department of Pediatric Surgery, Shizuoka Children's Hospital
Hiromu Miyake

OS3-4 Inguinal Hernia in Extremely Low Birth Weight Infants

Japanese Red Cross Society
Eriko Fukami

OS3-5 The surgical outcome of extremely low birth weight infant in our institution

Department of Pediatric Surgery, Tokyo Women's Medical University Yachiyo Medical Center
Katsunori Kouchi

OS3-6 Our experience of VLBWI for last 34 years except the patients with perforation of intestines

Niigata University Graduate School of Medicine and Dental Sciences
Naoki Okuyama

17:30~18:30

Evening Seminar 1

18:30~19:30

Seminar of Pediatric Emergency

Room 3 (Nishiki)

AM

8:30~9:18

Oral Session 2 Gastrointestinal 1

Moderator Masaru Mizuno (Iwate Medical University)

O2-1 Intravenous atropine treatment in hypertrophic pyloric stenosis

Department of Pediatric Surgery, Kimitsu Chuo Hospital
Ayako Takenouchi

O2-2 Experience of management in 4 pediatric patients with esophageal achalasia

Department of Pediatric Surgery, Tohoku University
Kotaro Nishi

O2-3 Clinical course of anterior and posterior fundoplication

Department of Pediatric Surgery, Kyoto Prefectural University of Medicine
Kohei Sakai

- O2-4 Long-term conservative therapy of GERD in neurologically normal children based on pH monitoring
 Department of Pediatric Surgery, Iwaki Kyoritsu General Hospital
 Nobuyuki Sano
- O2-5 The evaluation of gastroesophagel reflux pre and post fundoplication in children
 Department of Pediatric Surgery, Kurume University School of Medicine
 Suguru Fukahori
- O2-6 Evaluation of Gastric Emptying measured by 13C-acetate breath test
 Department of Pediatric Surgery, Kurume University School of Medicine
 Shinji Ishii

9:18~10:14

Oral Session 3 Urology Moderator Kaoru Yoshino (Aichi Children's Health and Medical Center)

- O3-1 Consideration of testicular mal-position from the aspect of mal attachment of the gubernaculum
 Pediatric Surgery, Niigata University Graduate School
 Kengo Nakaya
- O3-2 An early blood recirculation of the testicular torsion by the manual reposition
 Tokyo Women's Medical University Yachiyo Medical Center
 Katsunori Kouchi
- O3-3 A study on pediatric ovarian torsion
 Department of Pediatric Surgery, Kagoshima University School of Medicine
 Misato Migita
- O3-4 The clinical review of 560 patients suffering from primary vesico-ureteral reflux
 Division of urology Saitama Childrens Medical Center
 Kenichiro Kobayashi
- O3-5 Evaluation of megaureter with ureteral plication
 Department of Urology, Kobe Children's Hospital
 Yoshikiyo Nakagawa
- O3-6 A Case Of Intravesical Penis With Vesico- intestinal Fissure
 Department of Urology, Saitama Children's Medical Center
 Takeshi Furuya
- O3-7 Hypospadias repair with an intact prepuce
 Aichi Children's Health and Medical Center
 Masato Watanabe

PM

16:25~17:30

Requested Theme Session 4 Current status of minimally invasive surgery in pediatric urology

Moderator Minoru Tada (Saitama Childrens Medical Center)
 Jyoji Yoshizsawa (Jikei University)

Keynote Lecture 2 Laparoscopic traction for the intra-abdominal testis; A new concept

Alexandria University, Egypt
 Sameh Shehata

- OS4-1 Three cases of lymphatic sparing laparoscopic Palomo varicocelectomy for varicoceles in children
 Department of Pediatric Surgery, Hiroshima City Hospital
 Reisuke Imaji
- OS4-2 Laparoscopic nephrectomy of the hypoplastic pelvic kidney with ectopicureter
 Department of Pediatric Surgery, Pediatric Urology, Ibaraki Children's Hospital
 Hajime Kawakami

- OS4-3 Retroperitoneoscopic renal surgery in children
Department of Pediatric General and Urogenital Surgery, Juntendo University School of Medicine
Hiroyuki Koga
- OS4-4 Endoscopic treatment for vesicoureteral reflux: Long term follow up results by single surgeon
Department of Pediatric Surgery Aiiiku Maternal & Children's Medical Center
Takao Fujimoto
- OS4-5 Trans-urethral operation used by DX/HA for vesico-ureteral reflux
Division of Urology Saitama Children's Medical Center
Kenichiro Kobayashi

17:30~18:30

Evening Seminar 2

Poster Room (Hana)

PM

15:00~15:30

International Poster Session 1 Intestinal Failure Moderator Motoshi Wada (Tohoku University)

- ISP1-1 MR enterography was effective for Ileal dysgenesis with enteric duplication and malrotation
Juntendo University School of Medicine, Japan
Hiroyuki Koga
- ISP1-2 Impact of intestinal rehabilitation in pediatric short bowel syndrome
Division of Pediatric Surgery, Jichi Medical University, Japan
Kosaku Maeda
- ISP1-3 Life-threatening risk factors and roles of intestinal transplantation in patients with intestinal failure
Dept. of Pediatric Surgery, Tohoku University Graduate School of Medicine, Japan
Motoshi Wada
- ISP1-4 Assessment of mortalities and the indication for intestinal transplantation in patients with the most severe type of intestinal failure Dept. of Pediatric Surgery, Tohoku University Graduate School of Medicine, Japan
Motoshi Wada
- ISP1-5 Home Specialized Nutrition Support in Children in Developing Countries
Division of Paediatric Surgery & Paediatric Urology, University of Malaya Medical Centre, Malaysia
Muthurangam T Ramanujam
- ISP1-6 Fluorescent staining of Sox10 as a marker of intestinal ischemia
Juntendo University School of Medicine, Japan
Manabu Okawada

15:30~16:00

International Poster Session 2 Minimally Invasive Surgery

Moderator Hiroyuki Koga (Juntendo University)

- ISP2-1 The combination of double balloon enteroscopy with laparoscopic surgery for the gastrointestinal bleeding with negative Tc-99m Meckel's diverticulum scanning
Surgical Department of Children's Hospital, Fudan University, PR China
JiangBin Liu
- ISP2-2 Thoracoscopic repair after extrathoracic esophageal elongation for long-gap esophageal atresia
Department of Pediatric General and Urogenital Surgery, Juntendo University School of Medicine, Japan
Go Miyano

- ISP2-3 Precise preoperative measurement of the gap in typeC esophageal atresia facilitates thoracoscopic repair
Department of Pediatric General and Urogenital Surgery, Juntendo University School of Medicine, Japan
Hiroyuki Koga
- ISP2-4 Minimally invasive surgery for duodenal stenosis: Using endoscopic incision and dilatation
Third Department of Surgery, Tokyo Medical University, Japan
Yutaka Hayashi
- ISP2-5 Apply SILS to pediatric surgery for Minimally Invasive Treatment in child with splenomegaly
First Department of Surgery, Dokkyo Medical University Hospital, Japan
Kentaro Okamoto
- ISP2-6 Experience of single incision laparoscopic cholecystectomy in two children
Hepato-Biliary-Pancreatic Surgery and Pediatric Surgery, Liver Center, Yao Tokushukai General Hospital, Japan
Takuya Kimura

16:00~16:30

International Poster Session 3 Thorax

Moderator Noriaki Usui (Osaka University)

- ISP3-1 A rare case of bilateral congenital diaphragmatic hernia
Department of Pediatric General & Urogenital Surgery, Juntendo University School of Medicine, Japan
Go Miyano
- ISP3-2 Congenital chylothorax
Dept. of Pediatric Surgery, The National Center of Maternal and Childhood Care, Kyrgyzstan
Aysuluu E. Karabay
- ISP3-3 Minimal invasive surgery for congenital cystic adenomatoid malformation
Department of Pediatric Surgery, University of Ulsan College of Medicine, Asan Medical Center, Republic of Korea
Jihee Hwang
- ISP3-4 Surgical intervention for congenital diaphragmatic hernia. Open versus thoracoscopic surgery
Department of Pediatric Surgery, Juntendo University Urayasu Hospital, Japan
Takaaki Tanaka
- ISP3-5 Could thoracoscopic repair take the place of opening surgery on the diaphragmatic eventration in children?
Surgical Department of Children's Hospital, Fudan University, PR China
JiangBin Liu
- ISP3-6 Management of Malignant Chest Wall Tumors in Children
Division of Paediatric Surgery, University of Malaya Medical Centre, Malaysia
Srihari S Singaravel

15:00~15:30

International Poster Session 4 Hepatobiliary

Moderator Hideaki Tanaka (University of Tsukuba)

- ISP4-1 The application of transarterial embolization on congenital hepatoportal arteriovenous fistula in children
Surgical Department of Children's Hospital, Fudan University, PR China
JiangBin Liu
- ISP4-2 Clinical Aspects of Pancreatico-Biliary Maljunction—Children vs Adults
Dept. of Surgery, Kitasato Univ. School of Medicine, Japan
Noriko Takeda
- ISP4-3 Outcomes of Infants with Prenatally Diagnosed Cystic Biliary Atresia
Department of Gastroenterological Surgery I, Hokkaido University Graduate School of Medicine, Japan
Tadao Okada

- ISP4-4 Triangular Cord Sign was not Useful for the Diagnosis of Type 1 Cystic Biliary Atresia
Department of Gastroenterological Surgery I, Hokkaido University Graduate School of Medicine, Japan
Tadao Okada
- ISP4-5 Usefulness of Bacterial 16S rRNA Markers for Fecal Samples to Diagnose Biliary Atresia
Department of Gastroenterological Surgery I, Hokkaido University Graduate School of Medicine, Japan
Tadao Okada
- ISP4-6 Effect of Cholangitis after Kasai's Portoenterostomy on Fecal Bacterial Molecular Profiles
Department of Gastroenterological Surgery I, Hokkaido University Graduate School of Medicine, Japan
Tadao Okada
- 15:30~16:00
International Poster Session 5 Oncology Moderator Hajime Takayasu (University of Tsukuba)
- ISP5-1 Neuroblastoma: Outcome over a 14 Year Period from AIIMS NB 96 Protocol
Dept. of Pediatric Surgery, All India Institute of Medical Sciences, India
Ankur Mandelia
- ISP5-2 Congenital Hepatoblastoma: An incidental finding on fetal autopsy
Dept. of Pathology, Jawaharlal Institute of Postgraduate Medical Education and Research (JIPMER), India
Neha Singh
- ISP5-3 Clinical features and outcomes of Hepatoblastoma
Department of Pediatric and Pediatric Endoscopic Surgery, Tokushima University Hospital, Japan
Keigo Yada
- ISP5-4 Investigation of malignant hepatic tumors using contrast-enhanced ultrasonography with Sonazoid
Department of Pediatric Surgery Hirosaki University School of Medicine, Japan
Michihiro Sugai
- ISP5-5 Management and outcomes in massive bilateral wilms tumors
All India Institute of Medical Sciences, India
Deepak Mittal
- ISP5-6 The surgical management of wilms' tumor with intracaval thrombus in children
Surgical Department of Children's Hospital, Fudan University, PR China
JiangBin Liu
- 16:00~16:30
International Poster Session 6 Emergency Medicine Moderator Tatsuru Kaji (Kagoshima University)
- ISP6-1 Acute Gastric Volvulus in Infants & Children
Division of Paediatric Surgery, University of Malaya Medical Centre, Malaysia
Yee Ian Yik
- ISP6-2 Management of Duodenal Haematoma
Division of Paediatric Surgery & Paediatric Urology, University of Malaya Medical Centre, Malaysia
Muthurangam T Ramanujam
- ISP6-3 Four cases of life-threatening peptic ulcer bleeding associated with virus infection
Department of Surgery, Kitasato University, Japan
Eiichiro Watanabe
- ISP6-4 Bowel injury patterns in children
Vladivostok State Medical University, Russia
Anna N. Shapkina
- ISP6-5 Neonatal spontaneous bile duct perforation presenting as giant intra-abdominal cyst
Department of Paediatric Surgery, Leicester Royal Infirmary, United Kingdom
Jonathan Durell

ISP6-6 Evaluation of Injury Severity Scale in children with Trauma in our Emergency Center
 Division of Pediatric Surgery, St. Marianna University School of Medicine, Japan
 Hideki Shima

15:00~15:30

International Poster Session 7 Urology Moderator Hideki Shima (St. Marianna University)

ISP7-1 Current Status of Nephrectomy in Unilateral Multicystic Dysplastic Kidneys (MCKD)
 All India Institute of Medical Sciences, India
 Deepak Mittal

ISP7-2 Experience of Pediatric Ovarian Cyst at Single Institute St Marianna University Hospital, Japan
 Mariko Koyama

ISP7-3 Angiomyolipoma of the tunica dartos of the scrotum in infancy
 Third Department of Surgery, Tokyo Medical University, Japan
 Yutaka Hayashi

ISP7-4 The Role of laparoscopy and ultrasound in the management of "Impalpable Testes" in young infants
 Div of Pediatric Surgery University of Indonesia, Indonesia
 Iskandar R Budianto

ISP7-5 Should small size CPPV be left or ligated in laparoscopic inguinal hernia repair in children?
 Department of Pediatric Surgery, Graduate School of Medical Science, Kyoto Prefectural University of Medicine, Japan
 Osamu Kimura

ISP7-6 Long term follow up result of posterior urethral valve management
 SGPGIMS, India
 Vijai Datta Upadhyaya

15:30~16:00

International Poster Session 8 Gastrointestinal Tract 1

Moderator Osamu Kimura (Kyoto Prefectural University)

ISP8-1 Effectiveness of preoperative use of antibiotics to prevent SSIs in laryngotracheal separation
 Department of Surgery, School of Medicine, Kitasato University, Japan
 Eiichiro Watanabe

ISP8-2 Predictive factor for recurrent appendicitis after initial successful conservative treatment
 Department of Gastrointestinal and Pediatric Surgery, Mie University Graduate School of Medicine, Japan
 Yuhki Koike

ISP8-3 Diagnosis and management of the rare case of intra-splenic abscess following perforated appendicitis
 Department of Paediatric Surgery, Leicester Royal Infirmary, United Kingdom
 Jonathan Durell

ISP8-4 Mesenteric Inflammatory Pseudotumor of the Small Intestine Presenting with Intestinal Obstruction
 in a Child: Case Report and Literature Review
 Dept. of Pediatric General and Urogenital Surgery, Juntendo Univ. School of Medicine, Japan
 Toshiaki Takahashi

ISP8-5 Intestinal malrotation with fixed partial volvulus in an adult
 Department of Surgery, Dankook University, College of Medicine, South Korea
 Kil Hwan Kim

ISP8-6 Risk factors and treatment for persistent gastrocutaneous fistula of post-Nissen fundoplication
 Department of Gastroenterological Surgery I, Hokkaido University Graduate School of Medicine, Japan
 Hisayuki Miyagi

16:00~16:30

International Poster Session 9 Miscellaneous

Moderator Kan Terawaki (Saitama Medical University)

- ISP9-1 A Child with Colocolonic Intussusception Due to a Large Colonic Polyp: Case Report and Literature Review
Dept. of Pediatric General and Urogenital Surgery, Juntendo Univ. School of Medicine, Japan
Toshiaki Takahashi
- ISP9-2 The "Open-Book" variation of component separation for repair of massive ventral hernia
Division of Pediatric Surgery, Department of Surgery, Showa University School of Medicine, Japan
Rie Suganuma
- ISP9-3 Dorsal mesenteric agenesis without atresia causing bowel ischemia in an extremely low birth weight infant
Dept. of Pediatric Surgery, Maternity and Children Hospital, Saudi Arabia
Nasser A. Shukri
- ISP9-4 Usefulness of intra-ductal ultrasonography combined with low pressure balloon
Third Department of Surgery, Tokyo Medical University, Japan
Yutaka Hayashi
- ISP9-5 Dawn syndrome at children with congenital defects
Vladivostok State Medical University, Russia
Anna N. Shapkina
- ISP9-6 Ultrathin Silicon Sheet Arthroplasty for Recurrent TMJ Ankylosis in Children- A Good Alternative to Conventional Techniques
Department of Plastic Surgery Sanjai Gandhi Post Graduate Institute of Medical Sciences, India
Ankur Bhatnagar

15:00~15:35

International Poster Session 10 Gastrointestinal Tract 2

Moderator Toko Shinkai (University of Tsukuba)

- ISP10-1 Unusual case of perineal fistula with a high anorectal anomaly
Department of Paediatric Surgery, Leicester Royal Infirmary, United Kingdom
Preethi Bhishma
- ISP10-2 Long colonic duplication, without a common wall, reflected completely on itself intraluminally
Department of Pediatric General & Urogenital Surgery, Juntendo University School of Medicine, Japan
Go Miyano
- ISP10-3 Does a learning curve for surgery affect postoperative fecal continence in Hirschsprung's disease?
Department of Pediatric General & Urogenital Surgery, Juntendo University School of Medicine, Japan
Go Miyano
- ISP10-4 Novel predicting factors by enema contrast examination for Hirschsprung disease
Department of Gastroenterological Surgery I, Hokkaido University Graduate School of Medicine, Japan
Hisayuki Miyagi
- ISP10-6 The alternative operative treatment of the intestinal neuronal dysplasia in a newborn: A case report
Pediatric Surgery Unit, Department of Surgery, Khon Kaen Hospital, Thailand
Chulathip Nakarerngrit
- ISP10-7 Our experience with Colo-Vaginoplasty
Division Of Paediatric Surgery & Paediatric Urology, Department of Surgery & Department of Obstetrics & Gynaecology, Malaysia
Srihari S Sin Garavel

15:35~16:15

Poster Session1 Body surface 1 (inguinal hernia)

Moderator Kazuhiro Kameoka (Ehime University)

- P1-1 Six cases of internal inguinal hernia in children Department of Surgery, Gunma Children's Medical Center
Hideki Yamamoto
- P1-2 Recurrent Inguinal Hernia Department of Pediatric Surgery, Kyorin University Faculty of Medicine
Tomohiro Mochizuki
- P1-3 Direct inguinal hernia in children: a case report Hyogo Prefectural Tsukaguci Hospital
Kotaro Eriguchi
- P1-4 Prediction of contralateral inguinal hernias in children: A prospective study of 357 patients
Department of Pediatric Surgery, Nihon University School of Medicine
Kiminobu Sugito
- P1-5 The required number of operations to master conventional inguinal hernia repair
Department of Pediatric Surgery, Osaka City General Hospital
Koichi Ohno
- P1-6 The Efficacy and Safety of LPEC for Inguinal Hernia in Infants Under One Year of Age
Saga Prefectural Hospital KOSEIKAN
Koichiro Yoshimaru
- P1-7 Importance of observation around internal inguinal rings in LPEC with inguinal hernia in children
Department of Surgery, Kariya-Toyota General Hospital
Yasunobu Shimizu
- P1-8 Advantage and disadvantage of LPEC for pediatric inguinal hernia and hydrocele
Department of Pediatric Surgery, Children's Medical Center, Showa University Northern Yokohama Hospital
Komei Suzuki

15:00~15:30

Poster Session 2 Pediatric endosurgery 1

Moderator Hiroshi Kawashima (Saitama Children's Medical Center)

- P2-1 The therapeutic experience of using an early thoracoscopic scraping and drainage for pyothorax
Department of Pediatric Surgery, Surgery, Juntendo University School of Medicine
Manabu Okawada
- P2-2 Thoracoscopic excision of foregut duplication in newborn
Department of Pediatric General and Urogenital Surgery, Juntendo University School of Medicine
Hiroyuki Koga
- P2-3 Experience of thoracoscopic surgery to a diaphragm disease
Department of Pediatric Surgery, St.Marianna University Hospital
Hideki Nagae
- P2-4 Device in the surgical technique of laparoscopic fundoplication in our department
Department of Pediatric Surgery of Japanese Red Cross Kumamoto Hospital
Hirotsugu Terakura
- P2-5 Laparoscopic repair for Upside down type esophageal hiatal hernia in child: A case report
Pediatric Surgery, Tsuruoka Municipal Shonai Hospital
Masahiro Ohtaki
- P2-6 Laparoscopic Surgery in Patients with Inflammatory Bowel Disease
Department of Pediatric Surgery, Chiba University Hospital
Takeshi Saito

15:30~16:00

Poster Session 3 Pediatric endosurgery 2

Moderator Hiroshi Take (Kanagawa Children's Medical Center)

- P3-1 Our cases of single incision laparoscopic surgery
Section of Pediatric Surgery, Department of Surgery, School of Medicine, Kinki University
Toshio Sawai
- P3-3 Clinical usefulness of SILS devices in pediatric laparoscopic surgery
Department of Pediatric Surgery, Niigata University, Graduate School of Medical Science
Yuhki Arai
- P3-4 Utility of Transumbilical laparoscopically assisted appendectomy
Department of Pediatric Surgery, Japanese Red Cross Society Himeji Hospital
Tadashi Hatakeyama
- P3-5 Laparoscopic appendectomy (LA) in children - Comparison of the conventional LA and SILA
Department of Pediatric Surgery, Nara Hospital, Kinki University School of Medicine
Mitsugu Owari
- P3-6 Effect of the scoliosis in neurologically patients for single-incision laparoscopic fundoplication
Departments of Surgery Iwate Medical University School of Medicine
Megumi Kobayashi

16:00~16:30

Poster Session 4 Pediatric endosurgery 3

Moderator Ryuichiro Hirose (Fukuoka University)

- P4-1 Result of Pediatric Endoscopic Surgeries in our institute. What is necessary for the improvement?
Department of Surgery, Kanagawa Children's Medical Center
Hiroshi Take
- P4-2 The training of endoscopic surgery for pediatric surgeons
Department of Pediatric Surgery, Graduate School of Medical Science, Kyushu University
Ryota Souzaki
- P4-3 Gastric submucosal tumor resection using laparoscopic and endoscopic cooperative surgery (LECS)
Department of Pediatric Surgery, Hyogo College of Medicine
Hiroomi Okuyama
- P4-4 Laparoscopic Assisted Gastrostomy - Simple and Safe Method -
Shizuoka Children's Hospital
Hiroshi Nouse
- P4-5 Transumbilical laparoscopically assisted appendectomy with EZ access
Tokyo Women's Medical University Yachiyo Medical Center
Ryohei Shibata
- P4-6 Present condition and future of splenectomy -introducing of splenectomy by SILS-
First Department of Surgery and Pediatric Surgery, Dokkyo Medical University
Kentaro Okamoto

15:00~15:25

Poster Session 5 Pediatric oncological research Moderator Shuichiro Uehara (Osaka University)

- P5-1 Novel findings of the mechanism of the cell death in neuroblastoma induced by HVJ-E
Pediatric Surgery, Graduate School of Medicine, Osaka University
Motonari Nomura
- P5-2 Detection of MYCN amplification in neuroblastoma using blood plasma.DNA
Department of Pediatric Surgery, Hiroshima University Hospital
Eiso Hiyama
- P5-3 Pathological findings of relapse unilateral favorable histology wilm's tumor
Department of Pediatric Surgery, Kobe Children's Hospital
Hiroaki Fukuzawa
- P5-4 Hedgehog Signal Inhibitors Suppress the Invasion of Human Rhabdomyosarcoma Cells
Department of Pediatric Surgery, Osaka University Graduate School of Medicine
Takaharu Oue
- P5-5 The present state and future prospect of the research for advanced pediatric solid tumor
Division of pediatric surgery, National center for children's health and development
Yasushi Fuchimoto

15:25~15:55

Poster Session 6 Oncology 1 Moderator Satoshi Kondo (Nagoya City University)

- P6-1 Synovial sarcoma of the intercostal muscle resected with the right chest wall: a case report
Kyoto Prefectural University of Medicine Pediatric Surgery
Kiyokazu Kim
- P6-2 Two cases of solid-pseudopapillary neoplasm of the pancreas who underwent laparoscopic enucleation
Department of Pediatric Surgery, Hyogo College of Medicine
Takashi Sasaki
- P6-3 A Case of Solid-Pseudopapillary Tumor (SPT) in a child
Division of Pediatric Surgery, Department of Surgery, Asahikawa Medical University
Masatoshi Hirasawa
- P6-4 A case of familial adenomatous polyposis treated by total colectomy in a 13-year-old girl
Yamaguchi Grand Medical Center
Tsutomu Kanagawa
- P6-5 A case of multiple endocrine neoplasia (MEN) type 2B
Department of Pediatric Surgery, Ishikawa Medical Center for Maternal and Child Health
Munetoshi Nambu
- P6-6 A case of rhabdomyosarcoma associated with Li-Fraumeni syndrome
Department of Pediatric Surgery, Akita University Hospital
Ryo Watanabe

15:55~16:30

Poster Session 7 Oncology 2 Moderator Takaharu Oue (Osaka University)

- P7-1 A case of bilateral ovarian transposition before proton treatment
Department of Surgery, Nagano Children's Hospital
Tamaki Iwade

- P7-2 Abdominal neuroblastoma with inferior vena caval tumor thrombus with right atrial extension
Division of Pediatric Surgery, Department of Surgery, Osaka University Graduate School of Medicine
Shuichiro Uehara
- P7-3 A single institution experience of 26 cases of Hepatoblastoma
Department of Surgery, Tokyo Metropolitan Children's Medical Center
Yuki Yamamoto
- P7-4 Summary of surgical treatment for hepatoblastoma at a single center in Japan
Department of Pediatric Surgery, Kyoto University
Shinya Okamoto
- P7-5 Outcome of hepatoblastoma treated with preoperative chemotherapy and delayed surgery in our center
Department of Pediatric Surgery, Saitama Children's Medical Center
Hiroshi Kawashima
- P7-6 Surgical supportive care in patients with pediatric malignancies in the era of multimodal therapy
Division of Pediatric Surgery, Department of Surgery, Osaka University Graduate School of Medicine
Shuichiro Uehara
- P7-7 Application of nuclear medicine for less invasive surgery of malignant solid tumors in children
Department of Pediatric Surgery, Keio University School of Medicine
Ryo Hotta

15:00~15:30

Poster Session 8 Urology 1 (Testis) Moderator Takashi Akiyama (Hiroshima City Hospital)

- P8-1 A Case of Femoral Testis
Department of Surgery, Kameda Medical Center
Masatoshi Matsunami
- P8-2 A case report of siblings with transverse testicular ectopia
Department of Pediatric Surgery, Oita Prefectural Hospital
Noritoshi Handa
- P8-3 Duplication of the vas deferens and epididymis in cryptorchism. Case report
Department of Pediatric Surgery, Saitama Medical University
Kan Terawaki
- P8-4 A Case Of Bilateral Intraabdominal Testes in a Girl Diagnosed at Laparoscopic Inguinal Hernia Repair
Department of Pediatric Surgery, Juntendo University Nerima Hospital
Asuka Kato
- P8-5 A case of testicular torsion caused by the abdominal remnant
Pediatric Surgery, Tokyo Bay Medical Center
Junichi Kusafuka
- P8-6 5 cases of polyorchidism
Children's Medical Center of Pediatric Surgery, Showa University Northern Yokohama Hospital
Tomokazu Nakagami

15:30~16:00

Poster Session 9 Body surface 2 Moderator Naoki Okuyama (Niigata University)

- P9-1 Evaluation of the body mass in patients with pectus excavatum. -before and after treatment-
Department of Plastic Reconstructive Surgery, Nagano Children's Hospital
Masahiko Noguchi
- P9-2 Advanced Nuss procedure for thoracic deformity with paternal Uniparental Disomy 14. A case report
Department of Pediatric Surgery, Kawasaki Medical School
Yuki Muta

- P9-3 Modified Ravitch operation for pectus excavatum Ibaraki Children's Hospital
Toshihiro Muraji
- P9-4 Analysis of a long term central venous catheterization in Kanazawa University Hospital
Department of Pediatric Surgery, Kanazawa University Hospital
Seisho Sakai
- P9-5 Usefulness and problems of the ultrasound guided central venous catheter in children
Department of Digestive and General Surgery, Shimane University School of Medicine
Yoko Mizota
- P9-6 A Case of Inferior Vena Cava Agenesis Occasionally Detected with Abdominal Pain
Department of Pediatric Surgery, Saishukan Hospital
Shinsuke Katsuno

16:00~16:30

Poster Session 10 Body surface 3

Moderator Mari Arai (The University of Tokyo)

- P10-1 A case of double thyroglossal duct cysts Department of Pediatric Surgery, Kanazawa University Hospital
Kozo Nomura
- P10-2 Lingual thyroglossal cyst: Report of three cases Pediatric Surgery, Kanazawa Medical University
Tsuyoshi Kuwahara
- P10-3 Congenital Dermoid Fistula of the Anterior Chest Region Kawaguchi Municipal Medical Center
Masashi Kurobe
- P10-4 Trial of umbilicoplasty by creating a longitudinal deep umbilical depression
National Hospital Organization Fukuyama Medical Center
Yukihiro Tatekawa
- P10-5 A case report of urachal remnants with liver abscess
Second Department of Surgery, Wakayama Medical University
Takashi Watanabe
- P10-6 Transumbilical laparotomy for pediatric surgical disease
Department of Pediatric Surgery, Fujita Health University
Masahito Hibi

15:00~15:35

Poster Session 11 Esophagus

Moderator Hiroyuki Noguchi (Kagoshima City Hospital)

- P11-1 Anastomotic stricture after repair of TEF treated with primary fundoplication: report of two cases
Perinatal Center, Department of Obstetrics and Gynecology, Miyazaki University School of Medicine
Motofumi Torikai
- P11-2 A case of esophageal atresia (type D) with tracheal atresia
Department of Pediatric Surgery, Nagasaki University Hospital
Yusuke Yamane
- P11-3 A Case of Congenital Esophageal Atresia with Left Lung Defect
Department of Pediatric Surgery, Kyushu Kosei-Nenkin Hospital
Tetsuro Kamimura
- P11-4 Cervical approach for resection of cervico-mediastinal esophageal duplication cyst
Department of Surgery, Kobe Children's Hospital, Hyogo, Japan
Yuichi Okata

- P11-5 Two cases of congenital esophageal stenosis –The efficacy of esophageal circular myectomy
Division of Pediatric Surgery, Department of Surgery, Jichi Medical University
Shigeru Ono
- P11-6 Case Report : Delayed Esophageal Stenosis in a Child Caused by a Piese of Film
Department of Pediatric Surgery, Showa University Medical School
Tomomi Kojima
- P11-7 Esophagography with the mixture of barium powder and curry rice
Division of Pediatric Surgery, Aichi Children's Health and Medical Center
Hidemi Takasu

15:35~16:20

Poster Session 12 Lower esophagus/Stomach Moderator Shuichi Ashizuka (Jikei University)

- P12-1 Esophageal achalasia in children
Division of Pediatric Surgery, Department of Surgery, Jichi Medical University, School of Medicine
Yuki Tsuji
- P12-2 Laparoscopic surgery for esophageal achlasia due to AAA syndrom
Dept. of Sugery, Tokyo Jikei University School of Medicine
Jyoji Yoshizawa
- P12-3 Perioperative antimicrobial prophylaxis for laparotomy Department of Surgery, Nagano Children's Hospital
Tomoko Hatata
- P12-4 Advantages and disadvantages of the laparoscopic fundoplication in infant
Department of Pediatric Surgery, Saitama Children's Medical Center
Takayuki Masuko
- P12-5 A case of gastric rupture, gastric perforation after Nissen fundoplication
Department of Pediatric Surgery, Fuji Heavy Industries Health Insurance Society Ota Memorial Hospital
Toshiya Morimura
- P12-6 Hiatus hernia in an infant with Cornelia de Lange syndrome Pediatric Surgery, Ehime University Hospital
Kazuhiro Kameoka
- P12-7 Three cases of gastric disease of infants required the emergent operation
Department of Pediatric Surgery, International University of Health and Welfare Hospital
Satohiko Yanagisawa
- P12-8 A case of successful surgical repair for solid segment type pyloric atresia using a novel procedure
Department of Pediatric Surgery, Japanese Red Cross Society, Wakayama Medical Center
Satoshi Yokoyama
- P12-9 A Pediatric Case Of Resected Gastric Aberrant Pancreas Because Of Repeated Stomachahe
Kurashiki Central Hospital
Keita Shimata

Poster Display 1

- DP-1 A neonatal case of cervical thymic cyst with stridor
Department of Pediatric Surgery, Tsuchiura Kyodo General Hospital
Tetsuo Hori
- DP-2 A case of neonatal piriform sinus fistula
Department of Pediatric Surgery, Japanese Red Cross Medical Center
Tetsuta Satoyoshi

- DP-3 A huge lymphangioma of neonate shrinking after sclerotherapy and inflammation
Pediatric Surgery, Niigata Prefectural Central Hospital
Masanori Uchiyama
- DP-4 A piriform sinus cyst in a neonate mimicking with cystic lymphangioma of a neck. A case report
Department of Surgery, Naha City Hospital
Akihiko Tamaki
- DP-5 Investigation of Laryngotracheal Separation
Tokyo Metropolitan Children's Medical Center
Masafumi Kobayashi
- DP-6 A case of intractable chylous ascites successfully treated with nonoperative therapy
Department of Pediatric Surgery, Ishikawa Prefectural Central Hospital
Nobuki Ishikawa
- DP-7 Simultaneous bilateral spontaneous pneumothorax with pleuropleural communication: A case report
Department of Pediatric Surgery, The University of Tokyo Hospital
Hiroki Kudo
- DP-8 One case that performed an operation for pneumothorax during the expiscation of the Marfan syndrome
Thoracic Surgery, Iwate Prefectural Central Hospital
Kojiro Shiga
- DP-9 A review of 4 right Bochdalek's hernia at a single children's hospital
Miyagi Children's Hospital Surgery
Takuro Kazama
- DP-10 A case of thoracoscopic repair of congenital diaphragmatic gerna
Division of Pediatric Surgery, Kansai Medikal University Hirakata Hospital
Kohei Takada
- DP-11 Thoracoscopic resection of mediastinal tumor in children : report of two cases
Department of Pediatric Surgery, Nagoya University Graduate School of Medicine
Naruhiko Murase
- DP-12 A case of esophageal duplication complicated congenital esophageal hiatus hernia
Department of Pediatric Surgery, Kurume University Hospital
Motomu Yoshida
- DP-13 Esophageal stenosis with fibromuscular type presenting similar US findings to tracheobronchial type
Department of Pediatric Surgery, Ehime Prefectural Central Hospital
Katsumi Muramori
- DP-14 Laparoscopic Heller-Dor Operation for Esophageal Achalasia: A Report of Case
Department of Pediatric Surgery, Faculty of Medical Sciences, Kyushu University
Junkichi Takemoto
- DP-15 Reoperation following unsuccessful fundoplication in childhood: Hiatal repair with ePTFE pledgets
Department of Surgery, Jikei University School of Medicine
Tomomasa Hiramatsu
- DP-16 A Case of Malignant Hyperthermia in Severely Retarded Children after Laparoscopic Fundoplication
Department of Pediatric Surgery, Saitama City Hospital
Masaharu Mori
- DP-17 A Case of Eosinophilic gastrocolitis with Hypertrophic pyloric stenosis
Department of Surgery, Hokkaido Medical Center for Child Health and Rehabilitation
Satsuki Hashimoto
- DP-18 A case of acute gastric volvulus in children
Department of Surgery, Faculty of Medicine, University of Yamanashi
Norio Hasuda
- DP-19 Neonatal hematemesis and Helicobacter pylori
Yodogawa Christian Hospital
Tomohiro Kitada

- DP-20 A case of intussusception caused by Meckel's diverticulum with ectopic pancreas
Department of Pediatric Surgery, Hyogo College of Medicine
Ryo Tsukada
- DP-21 A case of ileus due to the band which appendix and Meckel's diverticulum formed
Department of Pediatric Surgery, Nagaoka Red Cross Hospital
Satoshi Kanada
- DP-22 Ileus due to adhesive mesodiverticular band Pediatric Surgery, Miyazaki Prefectural Miyazaki Hospital
Hiroki Kai
- DP-23 Meckel's diverticulum, Our ten-year experience
Department of Pediatric Surgery Faculty of Medicine University of Tsukuba
Naoya Sakamoto
- DP-24 A case of transverse colon juvenile polyp Toyama Prefectural Central Hospital, Pediatric Surgery
Toru Yamazaki
- DP-25 Review of clinical process of Juvenile Polyp Department of Surgery, Kishiwada City Hospital
Yuya Miyauchi
