

Second Day (May 31, Friday)

Room 1 (Concord Ballroom AB)

AM

8:20~9:00

General Meeting

9:00~10:30

Symposium 1 New evidences in the field of pediatric surgery

Moderators Akira Toki (Showa University)

Hideo Yoshida (Chiba University)

S1-1 Conservative management of congenital tracheal stenosis; clinical features and course in 11 cases

Department of Pediatric Surgery, Kobe Children's Hospital

Terutaka Tanimoto

S1-2 Result of mediastinoscopic extended thymectomy for 13 patients of myasthenia gravis

Department of Surgery, Kanagawa Children's Medical Center

Norihiko Kitagawa

S1-3 New Findings of Umbilical Cord Ulceration

Div. of Pediatric Surgery, Japanese Red Cross Medical Center

Saori Nakahara

S1-4 Experience of Using Multichannel Intraluminal Impedance in Children with GERD

Department of Pediatric Surgery, Dokkyo Medical University

Junko Fujino

S1-5 The importance of initial treatment for Hypoganglionosis

Department of Pediatric Surgery, Aichi Children's Health and Medical Center

Yoshio Watanabe

S1-6 Therapeutic synbiotics enema maintains the integrity of the unused colon mucosa

Department of Pediatric Surgery, Chiba Children's Hospital

Yasuyuki Higashimoto

10:30~12:00

Workshop Problems in adult survivors with pediatric surgical diseases

Moderators Shigeru Ueno (Tokai University)

Yutaka Kanamori (National Center for Child Health and Development)

WS-1 Long term functional outcomes in patients treated for esophageal atresia

Department of Pediatric Surgery, Kagoshima University

Ryuta Masuya

WS-2 Follow-up in adults received ECMO to treat with congenital diaphragmatic hernia

Department of Pediatric Surgery, Central Hospital, Aichi Prefectural Colony

Junji Kato

WS-3 Long-term result and problem in patient with Hirschsprung's disease after surgery

Toho University Omori Medical Center

Minoru Kuroiwa

WS-4 Long-term Outcome of Patients Undergoing Liver Transplantation in Childhood

Pediatric Surgery, Kyoto University Hospital

Eri Ogawa

- WS-5 The sexual problem of cloacal anomaly at adulthood
Department of Pediatric Surgery, National Hospital Organization Okayama Medical Center
Yusuke Takahashi
- WS-6 Problems of the pediatric surgery patient who reached for adulthood. –malignant tumor–
Division of Pediatric Surgery, St. Marianna University Yokohama City Seibu Hospital
Shigeyuki Furuta
- WS-7 Cases of children with pediatric surgery adulthood-adolescence that corresponds as practitioner
Kurikidai Kawaguchi Clinic
Fumio Kawaguchi
- 12:00~13:00
Luncheon Seminar 3
- PM
13:00~13:45
Educational Lecture 1
Moderator Masahiro Fukuzawa (Osaka Medical Center and Research Institute for Maternal and Child Health)
- Recent advances in molecular genetics of pediatric solid tumors Gunma Children's Medical Center
Yasuhide Hayashi
- 13:45~15:30
Symposium 2 Future prospects for pediatric endoscopic surgery
Moderators Hiroomi Okuyama (Hyogo College of Medicine)
Hiroo Uchida (Saitama Children's Medical Center)
- S2-1 Design of Thoracoscopic surgery for Primary Spontaneous Pneumothorax in Children
Tokyo Metropolitan Children's Medical Center
Mari Arai
- S2-2 Nuss procedure with thoracoscopic rib cartilage resection for asymmetric pectus excavatum
Department of Pediatric Surgery, Kawasaki Medical School
Sadashige Uemura
- S2-3 Pitfalls during complete thoracoscopic surgery in children
Dept of Pediatr Surg Nagoya Univ.
Kenitiro Kaneko
- S2-4 Laparoscopic assisted pancreaticoduodenectomy for a child with a sporadic Zollinger-Ellison Syndrome
Department of Pediatric Surgery, Saitama Children's Medical Center
Hiroo Uchida
- S2-5 Single incision laparoscopic surgery for postoperative adhesive bowel obstruction
Department of Pediatric Surgery, Nara Hospital, Kinki University of Faculty of Medicine
Masafumi Kamiyama
- S2-6 modified posterior sagittal anorectoplasty for high anorectal malformation
Tokyo Metropolitan Children's Medical Center
Seiichi Hirobe
- S2-7 Reduced port laparoscopic total proctocolectomy in pediatric patients
Department of Gastrointestinal and Pediatric Surgery, Mie University Graduate School of Medicine
Mikihiro Inoue
- S2-8 Minimally invasive surgery versus open surgery for the treatment of solid tumor in children
Department of Pediatric Surgery, University of Tokyo
Kenichiro Konishi

S2-9 Laparoscopic surgery in patients with Glenn and Fontan circulation

Department of Pediatric Surgery, Shizuoka Children's Hospital
Hiromu Miyake

17:00~18:00

Ethics and Safety Management Seminar

Room 2 (Concord Ballroom C)

AM

9:00~10:30

International Panel Discussion 1: Intestinal failure

Moderators Prem Puri (National Children's Research Centre, Our Lady's Children's Hospital, Crumlin, Ireland)
José Roberto de Souza Baratella (Hospital Israelita Albert Einstein, Brazil)

IPD1-1 Novel Therapies for the Management of Pediatric Short Bowel Syndrome

St. Christopher's Hospital for Children, USA
Marshall Z Schwartz

IPD1-2 Nutritional Support of Infants with Intestinal Failure: There is something fishy going on here!

Alberta Children's Hospital / University of Calgary, Canada
David Sigalet

IPD1-3 Non-transplant surgery for Short Bowel Syndrome

University of Cape Town, Red Cross War Memorial Children's Hospital, South Africa
Alastair Millar

IPD1-4 Impact of Pediatric Intestinal Transplantation on Intestinal Failure in Japan

Pediatric Surgery, Osaka University, Japan
Takehisa Ueno

10:30~12:00

International Panel Discussion 2: Minimally invasive surgery

Moderators George W. Holcomb, III (Children's Mercy Hospitals and Clinics, USA)
Osamu Segawa (Tokyo Women's Medical University)

IPD2-1 Laparoscopic Surgery for Choledochal Cyst in Children

The Capital Institute of Pediatrics, China
Long Li

IPD2-2 Laparoscopic surgery for anorectal malformation

Department of Pediatric Surgery, Juntendo University School of Medicine, Japan
Atsuyuki Yamataka

IPD2-3 Thoracoscopic repair for congenital diaphragmatic hernia

National Hospital of Pediatrics, Vietnam
Nguyen T. Liem

IPD2-4 Mediastinal tumor resection by open or video-assisted approaches in 36 children

Tohoku University Hospital Department of Pediatric Surgery, Japan
Tomoyuki Sato

12:00~13:00

Luncheon Seminar 4

PM

13:00~14:10

International Panel Discussion 3: Redo surgery

Moderators Jay L. Grosfeld (Riley Children's Hospital, USA)

Tatsuo Kuroda (Keio University)

IPD3-1 Redo Esophageal Surgery: The Diagnosis and Management of Recurrent Tracheoesophageal Fistula
University of Michigan Medical School and C.S. Mott Children's Hospital, USA
Arnold Coran

IPD3-2 Redo Surgery for Biliary Atresia
Department of Pediatric Surgery, Tohoku University School of Medicine, Sendai, Japan
Masaki Nio

IPD3-3 Role of long-term t-tube stenting in re-do surgery of pediatric airway stenosis
Division of Pediatric Surgery, Jichi Medical University, Japan
Kosaku Maeda

14:10~15:00

International Session 1

Moderators Ken Hoshino (Keio University)

Toshihiro Muraji (Ibaraki Children's Hospital)

IS1-1 Tracheal diverticulum associated with esophageal atresia
Division of Pediatric Surgery, Mahidol University, Thailand
Monawat Ngermcham

IS1-2 Thoracoscopic repair for esophageal atresia and tracheoesophageal fistula prevents respiratory complications
Department of Pediatric General and Urogenital Surgery, Juntendo University School of Medicine, Japan
Hiroyuki Koga

IS1-3 Transcutaneous Electrical Stimulation (TES) and Intractable Chronic Constipation
Division of Paediatric Surgery, University of Malaya, Malaysia
Yee Ian Yik

IS1-4 Experiences of living donor small bowel transplantation for hypoganglionosis
Department of Surgery, KEIO University, School of Medicine, Japan
Ken Hoshino

IS1-5 Validity of preoperative evaluation of resectability for advanced HB in an institution capable of LT
Department of Transplantation and Pediatric Surgery, Kumamoto University, Japan
Yukihiro Inomata

15:00 ~16:00

International Session 2

Moderators Eiso Hiyama (Hiroshima University)

Tomoro Hishiki (Chiba Children's Hospital)

IS2-1 Expression of Sproutys and SPREDS is decreased during lung branching morphogenesis in nitrofen-induced pulmonary hypoplasia
National Children's Research Centre, Our Lady's Children's Hospital, Ireland
Florian Friedmacher

IS2-2 Pulmonary FGF-18 gene expression is downregulated during the canalicular-saccular stages in nitrofen-induced hypoplastic lungs
National Children's Research Centre, Our Lady's Children's Hospital, Ireland
Hiromizu Takahashi

- IS2-3 Laminin-1 promotes neuronal development in mouse embryonic gut
Pediatric Surgery, Juntendo University Nerima Hospital, Japan
Nana Nakazawa
- IS2-4 Effect of Abnormal Notochord Delamination on Hindgut Development in the Adriamycin Mouse Model
Division of Pediatric Surgery, Yokohamashi Seibu Hospital, Japan
Hideaki Sato
- IS2-5 Wnt Antagonist Frzb1 Inhibits Skeletal Myogenesis in Chick Embryos during Early Embryogenesis
National Children's Research Centre Our Lady's Children's Hospital, Ireland
Naho Fujiwara
- IS2-6 Assessment of Fine Needle Aspiration Cytology Samples for Molecular Genetic Analysis in Neuroblastoma
Dept. of Pediatric Surgery, All India Institute of Medical Sciences, India
Ankur Mandelia

16:00~16:50

International Session 3

Moderators Atsuyuki Yamataka (Juntendo University)
Sadashige Uemura (Kawasaki Medial School)

- IS3-1 ¹³C-ABT in delayed gastric emptying of gastroesophageal reflux with scoliosis
Department of Gastroenterological Surgery I, Hokkaido University Graduate School of Medicine, Japan
Tadao Okada
- IS3-2 The learning curving for laparoscopic excision on choledochal cyst in children
Surgical Department of Children's Hospital, Fudan University, PR China
JiangBin Liu
- IS3-3 Simple grass root intervention in a developing society to detect early cases of extreme perineal hypospadias being raised as girls
Department of Child Health, Wellington Regional Hospital, New Zealand
Prabal Mishra
- IS3-4 Banana-Split Clitoroplasty & Genitoplasty in Disorders of Sex Differentiation
Division of Paediatric Surgery & Paediatric Urology, University of Malaya Medical Centre, Malaysia
Muthurangam T Ramanujam
- IS3-5 Testicular Tumor in Undescended Testis in Children below 5 Years of Age
All India Institute of Medical Sciences, India
Deepak Mittal

18:00~19:00

Evening Seminar 3

Room 3 (Nishiki)

AM

7:20~8:20

Morning Seminar 1

9:00~9:55

Requested Theme Session 5 Understanding of gastrointestinal allergy in "pediatric surgery"

Moderators Hisayoshi Kawahara (Hamamatsu University)
Kiyoshi Tanaka (Kitasato University)

- OS5-1 Gastrointestinal Allergy on Neonates and Infants need for Differential Diagnosis from Acute Abdomen
Pediatric Surgery, Niigata City General Hospital
Hisataka Iida
- OS5-2 Food Protein-Induced Enterocolitis Syndrome Mimicking Pediatric Surgical Disorders
Department of Gastroenterology, Tokyo Metropolitan Children's Medical Center
Takatsugu Murakoshi
- OS5-3 Neonatal gastrointestinal surgery as a risk factor for cow's milk allergy
Department of Pediatric Surgery, Graduate School of Medicine, Chiba University
Tetsuya Mitsunaga
- OS5-4 6 case experiences of non-IgE dependent food-induced allergy with pediatric surgical diseases
Department of Pediatric Surgery, the University of Tokyo
Kan Suzuki
- OS5-5 A clinical aspect of gastrointestinal food allergy associated with short bowel syndrome
Department of Pediatric Surgery, Chiba Children's Hospital
Gen Matsuura
- OS5-6 Hirschsprung disease complicated with cow's milk allergy
Department of Pediatric Surgery, Osaka Medical Center and Research Institute for Maternal and Child Health
Satoshi Umeda

9:55~10:50

Requested Theme Session 6 New trends in nutritional supports

Moderators Minoru Yagi (Kurume University)

Kazuko Obana (Yamanashi Prefectural Central Hospital)

- OS6-1 Prospective trial of standardized treatment for catheter-related blood stream infection
Dept. of Pediatric Surgery, Aichi Children's Health and Medical Center
Wataru Sumida
- OS6-2 Serum citrulline level in patients with short bowel syndrome
First Department of Surgery, Dokkyo Medical University
Takashi Tsuchioka
- OS6-3 Long term outcome on home parenteral nutrition for benign intestinal failure in children
Department of Pediatric Surgery, Osaka University Graduate School of Medicine
Hideki Soh
- OS6-4 Disorders of lipid metabolism with the cause of carnitine deficiency
Dept of Pediatric Surgery, Kurume University
Kimio Asagiri
- OS6-5 Efficacy of omega 3 fatty acids in the treatment of intestinal failure associated liver disease
Miyagi Children's Hospital
Shintaro Amae
- OS6-6 Role of omega-3 fatty acid in neonates with intestinal failure associated liver disease
Division of Surgery, Department of Surgical Specialities, National Center for Child Health and Development
Toshihiko Watanabe

10:50~11:45

Requested Theme Session 7 Multidisciplinary team in pediatric surgery

Moderators Yu Watara (Showa University Northern Yokohama Hospital)

Saori Nakahara (Japanese Red Cross Medical Center)

- OS7-1 The role of a critical path for management of pediatric patients for cooperation among institutions
Kobe Children's Hospital
Yuko Bitoh
- OS7-2 Evaluation of articulatory functions before and after frenuloplasty of tongue-tie
Division of Pediatrics and Pediatric Surgery, International University of Health and Welfare Atami Hospital
Yasuo Ito
- OS7-3 Pediatric IBD team in the management for children with inflammatory bowel disease
Department of Gastrointestinal and Pediatric Surgery, Mie University Graduate School of Medicine
Keiichi Uchida
- OS7-4 Cooperation of pediatric surgeons & NST is important in nutritional support for blue intestines'
Department of Pediatric Surgery, Chiba Children's Hospital
Katsumi Yotsumoto
- OS7-5 Cooperation of various occupations in mental support
Department of Pediatric Surgery, Tohoku University
Kotaro Nishi
- OS7-6 Long-term QOL Following Major Neonatal Surgery ;The Importance of Multidisciplinary Mental Care
Department of Pediatric Surgery, Osaka Medical Center for Maternal and Child Health
Akio Kubota

PM

13:00~13:45

Requested Theme Session 8 Engineering based medicine in pediatric surgery

Moderators Satoshi Ieiri (Kyushu University)
Tetsuya Ishimaru (The University of Tokyo)

- OS8-1 Non-surgical treatment for pectus carinatum using a new sternal compressing brace
Department of Pediatric Surgery, Kawasaki Medical School
Sadashige Uemura
- OS8-2 A quantitative stiffness assessment on the biopsy needle in liver biopsy
Department of Pediatric Surgery, Keio University School of Medicine
Naoki Shimojima
- OS8-3 Project of Computer Aided Pediatric Surgery Made in Japan
Department of Pediatric Surgery, Faculty of Medical Sciences, Kyushu University
Satoshi Ieiri
- OS8-4 Development of a multi-DOF needle driver: assessment of handling of a needle in the vertical plane
Department of Pediatric Surgery, The University of Tokyo Hospital
Shinya Takazawa
- OS8-5 Suppression of acute rejection by selective EP4 agonist in rat organ transplantation models
Department of Surgery (Hepato-pancreatico-biliary and Transplantation), Graduate School of Medicine, Kyoto University
Tatsuya Okamoto

13:45~14:50

Requested Theme Session 9 Experimental animal models for pediatric surgical diseases and their evaluation

Moderators Takashi Shiomtake (Ishikawa Prefectural Central Hospital)
Tadao Okada (Hokkaido University)

Keynote Lecture 3 Development of an animal model to study congenital urinary obstruction

University of Otago, Wellington, New Zealand
Kevin C Pringle

- OS9-1 Experimental animal model of split notochord syndrome and split cord malformation
Department of Pediatric Surgery, Yamagata Prefectural Central Hospital
Takaki Emura
- OS9-2 Neutrophil extracellular traps in the intestinal microcirculation of septic model mouse
Department of Gastrointestinal and Pediatric Surgery
Yuhki Koike
- OS9-3 Development of anorectum and the striated muscle complex in Wnt5a conditional knockout mice
Department of Pediatric Surgery, Chiba University Graduate School of Medicine
Mitsuyuki Nakata
- OS9-4 Evaluation of the drug-induced Hirschsprung's disease model with the genetic labeling for the neural crest derivatives
Department of Pediatric Surgery, School of Medicine, Keio University
Takumi Fujimura

14:50~15:25

Oral Session 4 Trauma

Moderator Takeo Yonekura (Nara Hospital Kinki University Faculty of Medicine)

- O4-1 Blunt Abdominal Trauma of Children
Pediatric Surgery, Nagasaki University Hospital
Taiichiro Kosaka
- O4-2 Strategy for Blunt Trauma in Children; A Single Institution 61cases Experience
Division of Pediatric Surgery, Okinawa Prefectural Nanbu Medical Center & Children's Medical Center
Tsukasa Kinjo
- O4-3 The management of pediatric blunt liver trauma
Department of Pediatric Surgery, St. Mary's Hospital
Naoki Hashizume
- O4-4 6 pediatric cases of blunt pancreatic trauma who were firstly treated with conservative therapy
The Division of Surgery, the Department of Surgical Subspecialities, National Center for Child Health and Development
Masataka Takahashi

16:00~17:00

Afternoon Seminar 1

18:00~19:00

Evening Seminar 4

Poster Room (Hana)

PM

15 : 30~15 : 55

Poster Session 13 Duodenum

Moderator Masayuki Obatake (Nagasaki University)

- P13-1 A case of multiple duodenal atresia with giant cyst formation associated with biliary atresia
Division of Pediatric Surgery, Okinawa Chube Hospital
Yoshimitsu Fukuzato
- P13-2 A case of congenital duodenal atresia associated with reversed rotation
Pediatric Surgery, Kagoshima University
Tatsuya Yamashita
- P13-3 A case of congenital duodenal atresia with gas presence of biliary tract
Department of Pediatric Surgery, Kyushu Kosei Nenkin Hospital
Kaori Okamura

P13-4 A case of intestinal strangulation caused by transmesenteric hernia after repair of duodenal atresia
Ishii Memorial Aizen-en Aizen-bashi Hospital
Natsumi Tanaka

P13-5 A case of Norovirus gastroenterocolitis complicated by duodenal perforation
Department of Pediatric Surgery, Ishikawa Center for Maternal and Child Health, Ishikawa Prefectural Central Hospital
Takashi Shiomtake

15:55~16:30

Poster Session14 Small intestine 1 Moderator Hirokazu Kawase (St. Marianna University)

P14-1 A case report of intrauterine intussusception caused by ectopic pancreas
Department of Pediatric Surgery, Osaka City University
Miki Yamamoto

P14-2 A case of congenital ileal atresia by the intussusception due to the intestinal tract lymphangioma
Kagawa Children's Hospital
Akira Nii

P14-3 Multiple intestinal atresia and aplasia cutis congenita: an association with vanishing twin syndrome
Department of Pediatric Surgery, Ehime Prefectural Central Hospital
Tsuyoshi Kondo

P14-4 A case of multiple intestinal atresias treated by two-staged repair
Department of Pediatric Surgery, Toyama prefectural central hospital
Yasuhiro Okada

P14-5 Management of jejunal atresia and stenosis: Is transanastomotic tube useful?
Department of Pediatric Surgery, Kobe Children's Hospital
Mari Sonoda

P14-6 Experience with 30 cases of Intestinal Malrotation in Our Division
Department of Pediatric Surgery, Graduate School of Medical Sciences, Kyushu University
Genshiro Esumi

P14-7 Two cases of malrotation associated with duodenum stenosis
Pediatric Surgery, Fukuoka Children's Hospital and Medical Center for Infectious Disease
Yukiko Takahashi

16:30~17:00

Poster Session 15 Small intestine 2
Moderator Katsunori Kouchi (Tokyo Women's Medical University Yachiyo Medical Center)

P15-1 Three cases of primary intestinal bowel volvulus without malrotation
Department of Pediatric Surgery, Showa University Northern Yokohama Hospital
Ai Tayama

P15-2 A Case of Necrotizing Enterocolitis following Ophthalmological Examination
Department of Pediatric Surgery, Yamaguchi Grand Medical Center
Masahiro Kawasaki

P15-3 Prolonged small intestinal dilatation after NEC and LIP in extremely low birth weight infants
Department of Hepato-Biliary-Pancreatic and Pediatric Surgery, Saitama Medical Center, Saitama Medical University
Seiichiro Inoue

P15-4 Two cases of hypogenesis, mid-term result of extended resection of ileum and functional enterostomy
Department of Pediatric Surgery, Gunma Children's Medical Center
Akira Nishi

- P15-5 Two cases of segmental dilatation Pdiatricsurgery, Jichi Medical University
Katsuhisa Baba
- P15-6 Use of the umbilical site for temporary ostomy Saitama City Hospital
Fumiko Yoshida

15:30~16:00

Poster Session 16 Requested Theme Poster Session: New evidences in the field of pediatric surgery
Moderator Takuo Noda (Okayama University)

- P16-1 Review of Pectus Excavatum and Scoliosis in the Long-Term Prognosis of CDH
Department of Pediatric Surgery, Kyoto Prefectural University of Medicine
Taizo Furukawa
- P16-2 Postoperative period to attain full feeding in naonate with congenital intestinal atresia
Kanagawa Children's Medical Center
Hidehito Usui
- P16-3 Innovation of perioperative management for gastroschisis and raptured omphalocele
Department of Pediatric Surgery Kyoto Prefectural University of Medicine
Yuki Takeuchi
- P16-4 Clinicopathological Characteristics of 12 cases of Biliary Atresia type IIIa
Department of Pediatric Surgery, Faculty of Medicine, University of Tsukuba
Toko Shinkai
- P16-5 The evidence of non-operative management for isolated spleen injuries in children
Ibaraki Children's Hospital
Aki Matsuoka
- P16-6 Successful treatment of lymphedema with lymphaticovenular anastomosis
Department of Pediatric Surgery, Faculty of Medical Sciences Kyushu University
Ryoichi Nakahori

16:00~16:30

Poster Session 17 Small intestine 3 Moderator Takeshi Saito (Chiba University)

- P17-1 A case of pneumatosis cystoides intestinalis following treatment for leukemia
Department of Pediatric Surgery, Chiba Children's Hospital
Gen Matsuura
- P17-2 A case of CIIPS treated by extensive intestinal tract excision with enterostomy
Pediatric Surgery, Oita Prefectural Hospital
Tomoko Izaki
- P17-3 A Case Report : The infant with congenital short bowel syndrome had improved weight gain by STEP
Pediatric Surgery, NHO Nagara Medical Center
Hisashi Koumura
- P17-4 Changes of plasma Ghrelin and Glucagon-like peptide-2 following massive small bowel resection
Department of Pediatric Surgery, Developmental Medicine Field, Kagoshima University Graduate School of Medical and Dental Sciences
Mitsuru Muto
- P17-5 surgical treatment for postoperavive adhesional ileus
Department of Pediatric Surgery, Osaka City General Hospital
Tatsuo Nakaoka
- P17-6 Laparoscopic adhesiolysis for podiatric patients Department of Pediatric Surgery, Kitano Hospital
Masahito Sato

16:30~17:00

Poster Session 18 Small intestine 4 Moderator Munechika Wakisaka (St. Marianna University)

- P18-1 Diagnosis and management of duplication of the alimentary tract in seven cases
Department of Pediatric Surgery, Saga Prefectural Hospital Koseikan
Wataru Furuno
- P18-2 A case of intestinal duplication diagnosed an intra-abdominal cyst prenatally
Department of Pediatric Surgery Nihon University School of Medicine
Yoshiaki Ishizuka
- P18-3 An enteric duplication cyst of bifid tail of pancreas
Department of Pediatric Surgery, Okayama University Hospital
Takanori Oyama
- P18-4 A case of intussusception after rotavirus vaccination in infant
Division of Pediatric Surgery, Department of Surgery, Jichi Medical University, School of Medicine
Yuki Tsuji
- P18-5 Meckel's Diverticulum with Bleeding
Department of Pediatric Surgery, Kyorin University Faculty of Medicine
Yoshitomo Samejima
- P18-6 one case of the neonatal fecal ileus Department of Gastroenterological Surgery, Aichi Medical University
Takahisa Tainaka

15:30~15:55

Poster Session 19 Germ cell tumors 1 Moderator Shigeru Ono (Jichi Medical University)

- P19-1 Surgical intervention strategies for pediatric ovarian tumors
Department of Pediatric Surgery, Shizuoka Children's Hospital
Keiichi Morita
- P19-2 Clinical analysis of infantile germ cell tumor –about of our 34 cases– Oita Prefectural Hospital
Yoshiaki Takahashi
- P19-3 Summary of our operation cases of Teratoma for the past 20 years
Department of Pediatric Surgery Kurume University School of Medicine
Shinichiro Kojima
- P19-4 Report of the teratoma in our center for ten years
The division of Surgery, National Center for Child Health and Development
Michinobu Ohno
- P19-5 Clinical report of 45 cases of sarcooccygeal teratoma
Department of Pediatric Surgery, Tohoku University Hospital
Tomoyuki Sato

15:55~16:20

Poster Session 20 Germ cell tumors 2 Moderator Kazuya Ise (Fukushima Medical University)

- P20-1 A case of extragonadal germ cell tumor in the retroperitoneum
Pediatric Surgery, National Cancer Center Hospital
Hide Kaneda
- P20-2 A case of successful resection of mediastinal malignant germ cell tumor with SVC embolism
Department of Pediatric Surgery, Kyoto Prefectural University of Medicine
Fumiko Chiba

- P20-3 testicular mixed germ cell tumor -report of a case of 1-year-old
Department of Pediatric Surgery, St. Mary's Hospital
Saki Sakamoto
- P20-4 A case of growing teratoma syndrome after resection of mature ovarian teratoma
Department of Pediatric Surgery, Tohoku University Hospital
Megumi Nakamura
- P20-5 A case of the mediasternal teratoma resected via median sternotomy with acute respiratory distress
Department of Pediatric Surgery, Miyagi Children's Hospital
Hironori Kudo

16:20~17:00

Poster Session 21 Problems in adult survivors with pediatric surgical diseases

Moderator Kazutoshi Miyamoto (Asahikawa Medical University)

- P21-1 Long-term outcome in patients with congenital esophageal atresia
Department of Pediatric Surgery, Osaka Medical Center and Research Institute for Maternal and Child Health
Tomohiro Ishii
- P21-2 A case report of esophageal atresia with sliding hernia and Barrett esophagus in adult
Division of Pediatric Surgery, Department of Surgery, Kinki University
Hideki Yoshida
- P21-3 A case of jejunal perforation 26 years after esophageal replacement for Gross A esophageal atresia
Pediatric Surgery, Nagasaki University Hospital
Masayuki Obatake
- P21-5 Problems about the workings in more than 20 years old patients in Biliary Atresia
Department of Pediatric Surgery, National Hospital Organization, Kyushu Medical Center
Susumu Matsuo
- P21-6 Issues of follow up in pediatric surgery for adult patient post abdominal organ transplant
Pediatric Surgery, Osaka University Medical School
Takehisa Ueno
- P21-7 The pediatric living donor liver transplantation cases that reached for adulthood
Department of Pediatric Surgery, Fujita Hwalth University School of Medicine
Tatsuya Suzuki
- P21-8 A case report of bilateral hydrosalpinx, 28 years after sacrococcygeal teratoma resection
National Tochigi Hospital
Kazuhiko Hagane

15:30~15:55

Poster Session 22 Intestinal allergy 1

Moderator Yuko Tazuke (Osaka Medical Center and Research Institute for Maternal and Child Health)

- P22-1 Necrotizing enterocolitis occurred via milk allergy in a postoperative infant of the jejunal atresia
Department of General Thoracic, Breast and Pediatric Surgery, Fukuoka University Hospital
Masatoshi Nakamura
- P22-2 Cow's milk allergy in neonate with short bowel syndrome: a case report
Department of Pediatric Surgery, Hyogo Prefectural Tsukaguchi Hospital
Narito Takada
- P22-3 A Case of Milk Allergy With Intussusception After Surgery for Esophageal Atresia
Division of Pediatricsurgery, Department of Surgery, Asahikawa Medical University
Kazutoshi Miyamoto

- P22-4 A neonatal case with cow's milk allergy who do not tolerate elemental formula (Elental P)
Kitakyushu Municipal Medical Center
Takeshi Shirai
- P22-5 2 serious cases of gastrointestinal allergy Department of Surgery, The Jikei University School of Medicine
Sayuri Kaji
- 15:55~16:20
Poster Session 23 Intestinal allergy 2 Moderator Kan Suzuki (Gunma Children's Medical Center)
- P23-1 Breast milk allergy presented with varied symptoms: Case reports
Division of Pediatric Surgery, Department of Surgery, Kobe University Graduate School of Medicine
Chieko Hisamatsu
- P23-2 6 cases of neonatal cow's milk allergy at Kitakyushu Municipal Medical Center
Department of Pediatric Surgery, Kitakyushu Municipal Medical Center
Kyosuke Tatsuta
- P23-3 The neonatal cow's milk allergy cases who were suspected of neonatal surgical disease
Department of Pediatric Surgery Hiroshima City Hospital
Takashi Akiyama
- P23-4 Infants of cow's milk allergy which pediatric surgeons were consulted
Department of Surgery, Kitasato University
Kiyoshi Tanaka
- P23-5 examination of food allergy postoperative digestive surgery in neonate
Department of pediatric surgery, kinki university school of medicine Nara hospital
Katsuji Yamauchi
- 16:20~17:00
Poster Session 24 Nutritional supports Moderator Yoshiaki Tanaka (Kurume University)
- P24-1 3 cases of home parenteral nutrition patients well managed with prophylactic ethanol lock therapy
Department of Pediatric Surgery, Saitama City Hospital
Masaharu Mori
- P24-2 Use of peripherally inserted central venous catheter
Department of Pediatric Surgery, Kurume University School of Medicine
Nobuyuki Saikusa
- P24-3 Treatment strategy for extremely short bowel syndrome in Kyushu University
Department of Pediatric Surgery, Graduate School of Medical Sciences, Kyushu University
Kouji Nagata
- P24-4 A case of intestinal failure-associated liver disease successfully treated by omega-3 fatty acids
Department of Pediatric Surgery, Matsudo City Hospital Children's Medical Center
Keita Terui
- P24-5 A study of our cases of gastrostomy revision
Department of Pediatric Surgery, Aichi Prefectural Colony Central Hospital
Kenji Iio
- P24-6 Clinical investigation of the pediatric patients who underwent PEG in our institution
Department of Pediatric Surgery, Osaka University Graduate School of Medicine
Masahiro Zenitani
- P24-7 Use experience of "GB jejunal button^R" for transgastrostomic duodenal / jejunal feeding
Kanagawa Children's Medical Center
Norihiko Kitagawa

- P24-8 Rapid injection method of semi-solid table food for patients with gastrostomy
Department of Surgery, Nagano Children's Hospital
Shigeru Takamizawa

15:30~15:55

Poster Session 25 Patients with chromosomal abnormalities 1

Moderator Shintaro Amae (Miyagi Children's Hospital)

- P25-1 A case report of hepatoblastoma associated with 18-trisomy syndrome
Department of Pediatric Surgery, Hiroshima University Hospital
Yoshiyuki Onitake
- P25-2 The significance of surgery for esophageal atresia with trisomy 18
Department of Pediatric Surgery, Osaka Medical Center and Research Institute for Maternal and Child Health
Taro Goda
- P25-3 Surgical Care for the Infants with Chromosomal Abnormality in our NICU
Department of Pediatric Surgery, Graduate School of Medical Sciences, Kyushu University
Genshiro Esumi
- P25-4 The role of the surgeon for neonates with severe chromosomal abnormalities
Department of Pediatric Surgery, Nihon University School of Medicine
Shumpei Goto
- P25-5 Perinatal treatment for patients with chromosomal anomaly in our hospital
Department of Surgery, Iwate Medical University
Atsuhiro Arisue

15:55~16:20

Poster Session 26 Patients with chromosomal abnormalities 2

Moderator Norihiko Kitagawa (Kanagawa Children's Medical Center)

- P26-1 Surgical intervention in infants with severe chromosomal anomaly
Miyagi Children's Hospital
Shintaro Amae
- P26-2 Surgical management for patients with trisomy13 or trisomy18
Department of Pediatric Surgery, Hyogo College of Medicine
Satoko Nose
- P26-3 Surgical treatment in trisomy 13 and 18 patients: the role of the pediatric surgeon
Division of Pediatric Surgery, Department of Surgery, Jichi Medical University School of Medicine
Yoshiko Usui
- P26-4 What is the best surgical approach for infants with trisomy 13 or 18?
Department of Pediatric Surgery, Kyoto Prefectural University of Medicine
Koji Higuchi
- P26-5 Trisomy 13 and Trisomy 18 with Surgical Disease
Department of Pediatric Surgery, Kyorin University Faculty of Medicine
Yoshiko Watanabe

16:20~17:00

Poster Session 27 Emergency medicine

Moderator Takashi Tsuchioka (Dokkyo Medical University)

- P27-1 A case report of recurrent duodenal ulcer perforation National Mie Hospital
Kohei Matsushita
- P27-2 Nonoperative management of pancreatic duct injury in a child
Department of Pediatric Surgery, Ehime Prefectural Central Hospital
Yoichiro Oka
- P27-3 Venorrhaphy for Traumatic Retrohepatic Inferior Vena Cava Injury In a 3-year-old child
Niigata City General Hospital
Daisuke Masui
- P27-4 Two cases of perineal impalement injury in children Department of Surgery, Osaka General Medical Center
Koichi Deguchi
- P27-5 Usefulness of MDCT for the diagnosis of acute abdominal pain in children
Department of Hepato-Biliary-Pancreatic and Pediatric Surgery, Saitama Medical Center, Saitama Medical University
Akio Odaka
- P27-6 The management of Meckel's diverticulum in children
Department of Pediatric Surgery, St. Mary's Hospital
Shiori Tsuruhisa
- P27-7 Abdominal blunt injuries: 10 years experiences in our institution
Department of Pediatric Surgery, University of Tsukuba Hospital
Takahiro Jimbo
- P27-8 Role of pediatric specialist in emergency departments of Fukushima medical university hospital
Pediatric Surgery, Fukushima Medical University
Show Ishii

15:30~15:55

Poster Session 28 Minimally invasive surgery in pediatric urology 1

Moderator Reisuke Imaji (Hiroshima City Hospital)

- P28-1 Current practice of the minimally invasive surgeries in pediatric urology
Saga Prefectural Hospital Koseikan
Shono TaKeshi
- P28-2 The Efficacy of Laparoscopic Assisted Continuous Ambulatory Peritoneal Dialysis Catheter Insertion
Division of Pediatric Surgery, Department of Surgery II, Tokyo Women's Medical University
Osamu Segawa
- P28-3 Laparoscopic Pyeloplasty
Division of Pediatric Surgery, Department of Surgery II, Tokyo Women's Medical University
Osamu Segawa
- P28-4 The application of minimally invasive surgery to pediatric urology: upper urinary tract procedures
Dept of Pediatric Urology, Hokkaido Medical Center for Child Health and Rehabilitation
Kazuyuki Nishinaka
- P28-5 The usefulness of laparoscopic surgery for disorders of sex development
Saitama Childrens Medical Center Urology
Minoru Tada

15:55~16:20

Poster Session 29 Minimally invasive surgery in pediatric urology 2

Moderator Takao Fujimoto (Aiiiku Maternal & Children's Medical Center)

- P29-1 Laparoscopic ligation of varicocele testis in children -TANKO- operation-
Urology, Saitama Childrens Medical Center
Minoru Tada
- P29-2 Extravesical detrusorrhaphy for duplicated collecting or paraureteral diverticula
Dept of Pediatric Urology, Hokkaido Medical Center for Child Health and Rehabilitation
Kazuyuki Nishinaka
- P29-3 Ureteral orifice appearance as a predictor of outcome of Deflux procedure for vesicoureteral reflux
Department of Pediatric Surgery, Juntendo University Urayasu Hospital
Tadaharu Okazaki
- P29-4 Experience of the Deflux injection method using an epidural catheter for a vesicoureteral reflex
Juntendo University School of Medicine
Manabu Okawada
- P29-5 Minimally invasive treatment of vesicoureteral reflux
Department of Surgery, The Jikei University School of Medicine
Jyoji Yoshizsawa

16:20~16:55

Poster Session 30 Pediatric urology 3

Moderator Takafumi Goto (National Hospital Organization Okayama Medical Center)

- P30-1 A study on fetal dignosed neonatal ovarian cyst Department of Pediatric Surgery, Kagoshima University
Motoi Mukai
- P30-2 Ectopic scrotum with covered exstrophy, anorectal malformation and ipsilateral renal agenesis
Department of Pediatric Surgery, Faculty of Medicine, University of Tsukuba
Chikashi Gotoh
- P30-3 Treatment Strategy for Pseudoexstrophy without Imperforated Anus: Case Report and Literature Review
Department of Gastrointestinal and Pediatric Surgery1, Mie University Graduate School of Medicine, Japan
Kohei Otake
- P30-4 A case of Mixed Gonadal Dysgenesis Department of Urology, Saitama Children's Medical Center
Takeshi Furuya
- P30-5 A 20 year old woman with persistent cloaca needed vaginoplasty
Department of Pediatric Surgery, Matsudo City Hospital Children's Medical Center
Eriko Saito
- P30-6 Vaginal Reconstruction in Female Cloacal Exstrophy Patients
Department of Urology, Kobe Children's Hospital
Eiji Hisamatsu
- P30-7 Optimal timing and operative procedure of vaginoplasty for cloacal malformation
Department of Pediatric Surgery, Faculty of Meidical Sciences, Kyushu University
Satoshi Ieiri

15:30~15:55

Poster Session 31 Requested Theme Poster Session: Kampo/Herbal medicine

Moderator Tsukasa Nakama (Okinawa Prefectural Nanbu Medical Center & Children's Medical Center)

- P31-1 The efficacy of Juzen-taiho-to for treatment of intestinal fistula in pediatrics
Department of Pediatric Surgery Hirosaki University School of Medicine
Michihiro Sugai
- P31-2 The effect of Kampo medicine “Shokenchuto” on chronic constipation in children
Department of Surgery 1, Fukushima Medical University
Michitoshi Yamashita
- P31-3 Effect of Japanese Herbal Kampo Medicine Keishikasyakuyakuto
Division of Paediatric Surgery, St. Marianna University School of Medicine
Hideki Shima
- P31-4 Kampo Medicine Dai-Kenchu-To Prevents Bacterial Translocation in Rat model of Biliary Atresia
Department of Pediatric and Pediatric Endoscopic Surgery, Tokushima University Hospital
Keigo Yada
- P31-5 New developments using Kampo medicine for Pediatric Surgery patients
Pediatric Surgery, Department of Surgery, University of Yamanashi
Kunio Takano

15:55~16:25

Poster Session 32 Hepato-biliary 1 (biliary atresia)

Moderator Hideyuki Sasaki (Tohoku University)

- P32-1 A multicenter randomized trial of postoperative corticosteroid therapy for biliary atresia
Japanese Biliary Atresia Society
Toshihiro Muraji
- P32-2 ^{99m}Tc-DTPA-GSA Dynamic SPECT used evaluation of Liver function reserve biliary atresia
Pediatric Surgery, Kanazawa Medical University
Sadayoshi Takahashi
- P32-3 pathological examination of biliary atresia with pancreaticobiliary maljunction Kobe children's Hospital
Shogo Zuo
- P32-4 Evaluation of biliary atresia cases over 20 years of age
Department of Pediatric Surgery, Centaral Hospital of Aichi Prefectural Colony
Norihiro Niimi
- P32-5 Biliary atresia required liver transplantation because of liver infarction after Kasai procedure
Department of Pediatric Surgery, Osaka City University
Miki Yamamoto
- P32-6 3 cases of biliary atresia showing sensitivity to cow's milk associated antigen
Department of Pediatrics, Kitano Hospital
Hirofumi Shibata

16:25~16:55

Poster Session 33 Portal vein/Spleen

Moderator Masato Shinkai (Kanagawa Children's Medical Center)

- P33-1 Two cases of Portal Hypertension in Children
Department of Surgery, National Defense Medical College Hospital
Kazuki Koiwai
- P33-2 Two cases of Rex bypass using the recanalized umbilical vein Kanagawa Children's Medical Center
Fumio Asano

- P33-3 Living Donor Liver transplantation for Congenital Absence of the Portal Vein
Pediatric Surgery, Kyoto Prefectural University of Medicine
Shoichi Ishikawa
- P33-4 A case of Ductus venosus with heart failure. Effects of ductus venosus obstruction on heart failure
Department of Pediatric Surgery, Hiroshima University Hospital
Kaoru Ogura
- P33-5 A Case of Laparoscopic Splenectomy for Torsion of Wandering Spleen
Pediatric Surgery, Osaka City General Hospital
Atsushi Higashio
- P33-6 Laparoscopic splenectomy (TANKO) and splenic autotransplantation for wandering spleen with torsion
Division of Pediatric Surgery, Department of Surgery and Clinical Science, Yamaguchi University Graduate School of Medicine
Shunsaku Katsura

15:30~16:00

Poster Session 34 Extremely low birth weight infants 1

Moderator Minoru Kuroiwa (Toho University Omori Medical Center)

- P34-1 Surgical Treatment for Intestinal Perforation in NICU
Department of Pediatric Surgery, Japanese Red Cross Kyoto Daiichi Hospital
Eiichi Deguchi
- P34-2 Efficacy of tube enterostomy in ELBW infants with meconium related intestinal obstruction
Department of Pediatric Surgery, Kitakyushu Municipal Medical Center
Takeshi Yamanouchi
- P34-3 Pathological findings of intestinal disorders in extremely low birth weight infants
Department of Pediatric Surgery, Nihon University School of Medicine
Kensuke Ohashi
- P34-4 Parental nutrition associated liver disease in extremely low birth weight infants
Department of Pediatric Surgery, Osaka Medical Center and Research Institute for Maternal and Child Health
Katsuhisa Hirano
- P34-5 Surgical treatment and care for extremely low birth weight infant with right pulmonary hypoplasia
Pediatric Surgery, Niigata University, Graduate School
Naoki Yokota
- P34-6 Tracheostomy in extremely low birth weight infant
Kawaguchi Municipal Medical Center
Masashi Kurobe

16:00~16:30

Poster Session 35 Extremely low birth weight infants 2

Moderator Tetsuro Nakamura (Osaka City General Hospital)

- P35-1 Extremely low birth weight infant required surgical intervention
Department of Pediatric Surgery, Hiroshima City Hospital
Shintaro Hashimoto
- P35-2 Surgical management of congenital disease in extremely low birth weight infants
Kobe Children's Hospital
Yuko Bitoh
- P35-3 Surgical strategy for extra low birth weight infants in our hospital
Department of Pediatric Surgery, Yodogawa Christian Hospital
Ken Harumoto

- P35-4 Surgical treatment in extremely low birth weight infants
Perinatal Medical Center, Kagoshima City Hospital
Kazuhiko Nakame
- P35-5 Outcomes of extremely low birth weight infants with pediatric surgical anomalies
Department of Surgery, Kanagawa Children's Medical Center
Hiroshi Take
- P35-6 Children with ELBW, who Underwent Surgery at Our Facility
Seirei Hamamatsu General Hospital
Eiji Miyazaki

16:30~17:00

Poster Session 36 Neonates

Moderator Hideki Soh (Osaka University)

- P36-1 Neonatal surgery in high-frequency oscillatory ventilation
Department of Pediatric Surgery, Yamanashi Prefectural Central Hospital
Takeyuki Suzuki
- P36-2 Postoperative complications after enterostomy creation in neonates
Pediatric Surgery, Kansai Medical University
Yusuke Nakamura
- P36-3 A study on umbilical cord ulceration in congenital upper intestinal atresia
Department of Pediatric Surgery, Kumamoto City Hospital
Kenji Okumura
- P36-4 Clinical manifestations in infants with fetal ascites requiring surgical management
Department of Pediatric Surgery, Yamanashi Prefectural Central Hospital
Noboru Oyachi
- P36-5 A study about the advantage of prenatal diagnosis associated with surgical disease
Department of Pediatric Surgery, Chiba University Hospital
Kazuaki Harada
- P36-6 Perinatal Attendance of Pediatric Surgeons in our Maternal and Child Medical Care Center
Department of Pediatric Surgery, Graduate School of Medical Sciences, Kyushu University
Genshiro Esumi

Poster Display 2

- DP-26 A case with Juvenile Polyposis
Pediatric Surgery Aizenbashi Hospital
Seika Kuroda
- DP-27 A case of invagination from juvenile polyp in adolescence
Department of Pediatric Surgery, Kanazawa University Hospital
Kozo Nomura
- DP-28 Recurrent midgut volvulus after Ladd's procedure. a case report
Naha City Hospital
Masahito Yamazato
- DP-29 A report on two cases of intestinal malrotation in adults with abdominal pain
Second Department of Surgery, Yamagata University Faculty of Medicine
Megumi Nakamura
- DP-30 A case of intussusception in Henoch-Schonlein purpura
Pediatric Surgery, Toho Univ. Medical Center Omori Hosp.
Iwao Iwasaki
- DP-31 A case of Cystic Fibrosis caused by meconium ileus
Pediatric Surgery, Nagoya City West Medical Center
Yoko Sato

- DP-32 Two cases of segmental dilatation of the intestine
Pediatric Surgery, St. Mary Hospital
Takahiro Asakawa
- DP-33 a case of the obstruction in the ileum by small intestinal anisakiasis of the infant
Tokyo Women's Medical University Yachiyo Medical Center
Kiyooki Yabe
- DP-34 A case of pneumoperitoneum of preschooler
Yodogawa Christian Hospital
Yuko Harada
- DP-35 two rare surgery cases delayed abdominal symptom after abdominal trauma by bicycle
Faculty of Medicine, Nara Hospital Kinki University
Yuji Morishita
- DP-36 Is drainage tube necessary for perforated appendicitis?
Machida Municipal Hospital
Shinsuke Ohashi
- DP-37 A case of clostridium difficile colitis in a postoperative course of acute perforated appendicitis
Department of Pediatric Surgery, Osaka City General Hospital
Yuichi Takama
- DP-38 Clinical Efficacy of High-dose Administration of ABPC/SBT in Treating Perforated Appendicitis
Tokyo Women's Medical University Yachiyo Medical Center
Ryohei Shibata
- DP-39 Laparoscopic assisted transanal reversed colon polypectomy for sigmoid polyp
Department of Pediatric Surgery, Nihon University School of Medicine
Hiroyuki Kawashima
- DP-40 Analysis of patients with bloody stool and melena
Department of Pediatric Surgery, Nagasaki University Hospital
Yukio Inamura
- DP-41 A case report of the Variant Hirschsprung's disease presenting the sigmoid colon stenosis
The division of Pediatric Surgery, Juntendo Nerima Hospital
Hiroshi Murakami
- DP-42 Treatment for Currarino syndrome associated with funnel anus and segmental dilatation of the rectum
Pediatric Surgery, Osaka City University Medical School
Yoshiki Morotomi
- DP-43 Two cases of anal canal duplication
Pediatric Surgery, Hiroshima Prefectural Hospital
Sho Kurihara
- DP-44 Management of perineal abscess in infants with hainosankyuto and shiunko combination
Kyoto Yamashiro Medical Center
Yasunari Sasaki
- DP-45 A case of accidental impalement injury to the rectum
Department of Pediatric Surgery, Hiroshima Prefectural Hospital
Kazuhiro Ohtsu
- DP-46 Laparoscopic percutaneous extraperitoneal closure required an additional port for inguinal hernia
Department of Pediatric Surgery, Showa University
Akihide Sugiyama
- DP-47 A study on LPEC in male patients
Department of Pediatric Surgery Nasasaki University Hospital
Yusuke Yamane
- DP-48 The surgical resident's experience of laparoscopic inguinal hernia closure
Department of Pediatric Surgery, Hyogo Prefectural Tsukaguchi Hospital
Kentaro Watanabe
- DP-49 Device to do laparoscopic surgery LPEC to pediatric inguinal hernia safely
Department of Pediatric Surgery of Japanese Red Cross Kumamoto Hospital
Hirotosugu Terakura
